---

### **PROFESSIONAL SUMMARY**

Geographer holding a Bachelor of Arts degree in Geography from Moi University, trained in GIS, Remote Sensing, land surveying, cartography, and environmental assessment. Experienced in seasonal survey work, government-linked geospatial assignments, spatial workshops, and hands-on field operations using RTK GNSS, GPS, and Total Station. Possesses strong skills in geospatial data processing, thematic mapping, and spatial analysis, alongside experience supporting clients with academic and non-academic research. An environmental practitioner with complementary web development skills, capable of developing functional digital solutions and databases to support geospatial and environmental work.

---

### **KEY SKILLS**

#### **Geospatial & Surveying Skills**

- GIS and Remote Sensing
- Environmental assessment and spatial analysis
- Land surveying (RTK, GPS, Total Station)
- Cadastral and plain surveying
- Geodetic surveys
- Topographic surveying

#### **Software & Technical Tools**

- ArcGIS
- QGIS
- AutoCAD (survey plans and floor layouts)
- R Studio (basic spatial and statistical analysis)
- Google Earth Pro and Google Earth Engine
- Spatial data management systems
- Java Script, Cascading Style Sheet and Html.

## **EDUCATION**

### **Moi University**

Bachelor of Arts in Geography

Second Class Honours (Lower Division)

Graduated: 2025

### **Kanyawanga High School**

Kenya Certificate of Secondary Education (KCSE)

Mean Grade: C+ (51 Points)

Completed: 2020

### **Bukuria Schools**

Kenya Certificate of Primary Education (KCPE)

370 Marks

Completed: 2016

---

## **WORK EXPERIENCE**

### **Land Survey Assistant (Seasonal)**

#### **Homeland Surveyors, Othaya – Nyeri County**

February 2022 – October 2025

- Undertook seasonal survey assignments including cadastral, geodetic, and plain surveys.
- Operated RTK GNSS, GPS, and Total Station equipment for accurate field data collection.
- Prepared survey plans, site layouts, and coordinate computations using AutoCAD.
- Conducted boundary verification, topographic mapping, and basic utility mapping.
- Maintained survey records, supported field logistics, and assisted with client deliverables.

#### **GeoLink Surveyors, Nyeri County**

December 2024 – January 2025

- Participated in RTK GNSS surveys for land subdivision and boundary identification.
- Assisted in field data collection, beacon identification, and boundary re-establishment.
- Supported cadastral survey operations, including measurements and recording of field observations.
- Contributed to preparation of subdivision layouts and basic survey documentation.

- Worked under licensed surveyors to ensure compliance with survey standards and procedures.

### **Octa-Surveys and Engineering, Kwale County**

October 2025 – November 2025

- Assisted in conducting land surveys.
  - Collected field data using survey instruments and supported survey control establishment.
  - Participated in boundary surveys and topographic mapping exercises.
  - Assisted in preparation and checking of technical survey documents and drawings to ensure accuracy.
  - Supported general survey activities, including field coordination and data organization.
- 

### **Web Development (Freelance)**

October 2025 – Present

- Designed and developed a web-based survey data portal for Homeland Surveyors in October, 2025 to support secure storage, retrieval, and organization of survey maps, coordinate data, and project files.
  - Developed a logistics management portal for Chandaria Industries Ltd. to facilitate tracking, coordination, and management of logistics operations between December, 2025 and January, 2026.
- 

### **GIS & Remote Sensing Trainee (Industrial Attachment)**

#### **Directorate of Resource Surveys and Remote Sensing (DRSRS), Nairobi**

April 2024 – July 2024

- Gained practical experience in processing and interpreting satellite imagery for environmental monitoring and land use analysis.
- Participated in geospatial workshops on spatial data management and government mapping standards.
- Developed skills in preparing maps and spatial datasets for land and environmental management demonstrations.
- Supported road network mapping for infrastructure planning under technical supervision.

## **PROJECTS & PRACTICAL EXPERIENCE**

### **Academic Research Project**

#### **Determination of the Most Suitable Dumpsite Location in Kesses Subcounty, Uasin Gishu County, Kenya**

- Conducted GIS-based suitability analysis integrating land use, slope, hydrology, settlement proximity, and environmental constraints.
- Produced environmental risk and hazard maps to guide waste management decision-making.

### **Government-Linked Project**

- Field data collection and spatial data processing for road updates and infrastructure planning in Kiambu County.

### **Freelance GIS Projects**

- Environmental and spatial analysis support, including forest cover change detection in Uasin Gishu County, land use and land cover change analysis, and land fragmentation studies.
- Climate–water relationship analysis focusing on the interaction between climate variability and water availability in Machakos County.
- Agricultural spatial analysis, including tea farming suitability and productivity assessment in Kericho County and urban agriculture mapping in Eldoret Town.
- Land use planning and site suitability analysis for industrial development in Nyeri County.
- Spatial analysis support for solid waste management planning in Kesses Sub-County, Uasin Gishu County.
- Generation of shapefiles, thematic maps, spatial datasets, spatial reports, and analytical outputs to support academic and non-academic research clients across multiple study areas.
